About the project

The main topic of the project „Common roots – various paths” is culture diversity in many aspects of our life. Technology, economy and geopolitical situation in Europe change very fast and huge differences can be noticed between us and the generations of our parents or grandparents. We would like to use these differences to be more open to each other and the diversity will become our national wealth. Our main work method is to make short movies with the purpose of publishing them on social media. During the workshops we will go together through all stages of video production. Including planning, filming, post-production and promotion. The results of our project and work will be short movies that will present our groups, work and topic of the project.

Apart from that, the participants will take part in many activities, both theoretical and practical:

- presentations,
- orienteering game in Zakopane,
- language animations, ice braking games,
- workshops and discussions,
- trip to the mountains,
- brainstorming,
- national evenings and group presentations as a support international education of the participants
