## Youth Exchange Infopack

Dear future participants, in this infopack you can find a brief introduction on what to expect during the upcoming Youth Exchange and what the multiactivity – Be-Eco Entrepreneur is all about.

Dear Participants!

The Youth Exchange is coming closer and closer. As the organisers we have the majority of YE details arranged. We will be meeting in Campina in the end of April.

Now it is time to select participants and arrange transportation to the Romania.

The event has a very active schedule you will find the overview of activities on the following page. Hopefully we manage to get the entire programme done and we can bring amazing participants to this exciting learning experience.

Now, a few words about the Be-Eco Entrepreneur concept:

Due to rapid development of many industries and human activities we think that natural environment is becoming more and more endangered and as young generation we feel obliged to take action.

The project anticipates organisation of 2 youth exchanges, which will be mainly concerned with the topic sustainable development and eco-tourism, both in Romania and in Poland. Young people from 5 European countries from the Romania, Poland, Bulgaria, Lithuania and Slovakia will take part in two activities.

The upcoming first event will be taking place in a lovely Campina, get ready for hiking and visiting surrounding! We will be doing lots of fun outdoor activities: hiking, visiting agrotouristic farm. We also plan field trip to Bucharest.

Project is designed in the way to first provide participants with generic information about the sustainable development and let them together explore topics of Europe 2020 strategy in a very accessible way using non-formal education methodology.

Project is co-financed from the European Commission programme Erasmus+.

### Whom are we looking for:

We would like to engage young people interested in ecology, sustainable development, mountaineering and intercultural events, that are motivated to meet other young people from different cultures.

To join the project you do not need to be an expert in sustainable development. The programme is designed for everyone, and will provide participants with generic information regarding the topic.

The working language of the exchange will be English, thus it is essential for participants to be fluent in English.

Finally, things to bring/prepare before the project:

- examples of good practices of sustainable development from your countries
- presentation and food for the intercultural night

---
